

# Helmsman Storage Solutions Ltd t/a Helmsman

## Environmental Policy

It is the policy of Helmsman to operate an effective managed Environmental System in order to achieve the highest sustainable environmental standards in all fields of operation, by following the requirements of ISO 14001. (Our Company is not yet registered to the Environmental Standard ISO 14001: 2004. However our environment procedures are in line with the standard.)

The Company's strategy to environmental issues is mandatory upon all employees. Adherence to the systems introduced demonstrates the professional approach of the Management.

To this end, the Company assess the environmental impact of its operations on a continuous basis via its employees and Environmental Manager.

"Waste free" techniques are used by the Company to minimise the use of all materials, supplies and energy. This includes the maximum utilisation of renewable and recyclable materials and components, in the construction of our products and services. Environmental issues are included in all investment decisions.

Effective procedures are in place to ensure that we work closely with our suppliers and sub-contractors to achieve acceptable environmental standards.

Statute laws, regulations, approved code of practices and provisions by local authorities, applicable to Helmsman sites will be strictly observed.

### Roles and Responsibilities:

- It is the role of all employees to ensure the environmental impacts of our operations are managed effectively.
- All instances of non-compliance must be given to Trevor Walker Health & Safety officer who is responsible for all Environmental issues.
- The Health & Safety officer will ensure all issues are logged and actioned.
- The Health & Safety officer will ensure continuous assessment is monitored and recorded.

Issue: 5 Date: 23/02/2021

Signed:

Paul Gormley, Managing Director
