# Who We Are

With over 5,500 square metres of offices and factory in Bury St Edmunds, our local workforce has over 40 years of experience working with architects, designers, specifiers, contractors and end-users helping them realise their most creative projects.

We are used to working across different sectors from leisure, healthcare and education through to commercial, retail, construction and industrial.

We are able to offer off-the-shelf products as well as bespoke solutions, be they aluminium, steel, glass or solid grade laminate. With a wide range of colours and styles, coupled with options from charging points to different locking systems, we provide the very best solutions for any project.

We supply throughout the UK and Ireland as well as across Europe and the Middle East and can offer supply only solutions to a fully managed turnkey service if preferred by the client.

## Fabrication

All our lockers are manufactured at our factory in Suffolk where we have long-serving skilled teams producing high-quality bespoke lockers and cubicles manufactured for each project.

## Installation

Once the order is placed, the project is handed to the locker and cubicle installation manager who is responsible for overseeing the team that will install the lockers and cubicles. He works alongside the factory manager and ensures the products are manufactured on time and to the correct specification within the agreed time frame.

## After Sales Service

To maximise optimal performance and the longest life cycle, we offer a complete range of after-sales care and service. This ranges from a regular maintenance contract to ad hoc repairs. We handle repairs and maintenance of lockers and cubicles too.

The background of the right side of the page features a blurred image of architectural floor plans and a calculator. The floor plans show various rooms and corridors, with some areas highlighted in pink and green. The calculator is visible in the bottom right corner, showing numbers and mathematical symbols.

# Our Process

# Glass Lockers

Glass locker bodies are manufactured from aluminium and locker doors are from PAR 10mm toughened coloured glass with a roller coat paint finish inside the locker door.

Each locker is fitted with a plastic hook on the right-hand side as standard. Each door is complete with an aluminium plate with engraved numbers. Standard Cam Lock supplied for each door, other options available as an extra.

Our standard locker sizes are: 1800H x 300W x 450D, but we are more than happy to manufacture lockers to suit customer requirements and can create bespoke lockers with bespoke sizes.

Its non-porous nature means the surface doesn't absorb or allow the ingress of particles. In addition, these lockers do not require a lot of maintenance once installed and keep looking fresh and clean.

# Z Lockers

Z Lockers are often used where space optimisation is required and are designed for the storage of larger personal items and hanging space. If you require a space-saving solution Z lockers are perfect for you.

Z locker bodies are manufactured from heavy gauge mild steel or aluminium and stainless steel for a wet environment. Z locker doors are manufactured from solid grade laminate.

Each locker is fitted with two hooks on each side at the top of each compartment. Each door is complete with an oval plastic number plate. Standard cam lock or hasp lock supplied for each door, other options available as an extra.

Our standard locker sizes are: 1800H x 300W x 450D, but we are more than happy to manufacture lockers to suit customer requirements and can create bespoke lockers with bespoke sizes.

# Laminate Lockers

All the lockers we supply can be classed as 'heavy-duty' as they are all designed to be robust, strong and secure. Our laminate locker doors are made from high-end laminate, they give years of service and withstand wear and tear. Suitable for both wet and dry areas.

With a multitude of colour choices, designs and styles, laminate lockers can blend into existing surroundings and add to the mood and character of a room.

Each locker is fitted with two hooks on each side at the top of each compartment. Each door is complete with an oval plastic number plate. Standard cam lock or hasp lock supplied for each door, other options available as an extra.

Our standard locker sizes are: 1800H x 300W x 450D, but we are more than happy to manufacture lockers to suit customer requirements and can create bespoke lockers with bespoke sizes.

# Inline Cubicles

Our range of inline cubicles is designed to cope with the rigorous demands of both wet and dry environments. Inline cubicles are manufactured from solid grade laminate and can come in different sizes to suit different users from individuals to family pods as well as accessibility options.

Headrail material is from rounded extruded aluminium. Aluminium 'U' brackets with tamper-proof fixing used for securing panels to each other and walls.

Fixed door latch with circular faceplate and emergency release facility as standard. Door mounted latches are available as an option. Each door is front flushed fitted with 2 heavy-duty hinges, incorporating an anti-finger trap and anti-lift design.

Aesthetically, the doors and the panels are flush-fitting creating simple clean-cut lines. This makes areas look wider and longer and complement the look of lockers and other fittings.

With extra-long panels and doors, they are visually attractive as well as being extra secure and offering users unparalleled privacy. They can also accommodate shower cubicles with a privacy screen and bench seat as required. Inline cubicles range can be used for multiple purposes.

# Glass Cubicles

Opaque glass cubicles are the epitome of luxury and are frequently used in high-end applications.

The combination of glass with polished flat edges and stunning minimalist brushed stainless steel fittings looks fantastic and is the ultimate aesthetic finish perfect for both wet and dry environments. Match these lavish shower and toilet cubicles with glass lockers.

Manufactured from 11.52mm clear laminated toughened glass made up of 2 x 5mm glass panels with 1.52mm EVA interlayer with PAR 5mm/Dubb corners. The top rail is a polished stainless steel tube. Brushed stainless steel brackets for securing panels to each other and walls. Tamper-proof fixings are available as an alternative.

Each door is fitted with 2 brass hinges, incorporating an anti-finger trap and anti-lift design. The door can open inward or outward to suit site requirements. Easy to use robust brushed stainless steel indicator latch.

# Front Line Cubicles

Front line cubicles form part of our standard range and are suitable for wet and dry toilet and changing room applications. This bespoke range is available in different sizes and dimensions depending on the client's requirements.

Manufactured from solid grade laminate door 13 mm thick. All exposed edges smoothed and radiused. Headrail material is from rounded extruded aluminium. Aluminium 'U' brackets with tamper-proof fixing used for securing panels to each other and walls.

Fixed door latch with circular faceplate and emergency release facility as standard. Door mounted latches are available as an option. Each door fitted with 2 heavy-duty hinges, incorporating an anti-finger trap and anti-lift design.

# IPS & Vanity Units

## **IPS Panels**

IPS Panels (Integrated Plumbing System) allow for quick on-site installation coupled with clean-cut lines and a modern look. Maximum height up to 3000mm.

We manufacture a ground-breaking panelling system in either zinc plated wet spec metal or timber with a solid grade laminate decorative surface. These are perfect for toilets, urinals and basin units.

## **Vanity Units**

We are able to design and supply high-quality solutions for handwash units, hair-drying areas and baby change.

Manufactured from solid grade laminate in a wide range of colours, these are perfect for both wet and dry demanding environments.

# Bench Seating

We manufacture bench seating as either a standalone product or part of an integrated washroom solution with complimentary lockers and cubicles. Suitable for both wet and dry areas, the high-quality bench seating provides comfort and durability.

They are available in a wide range of configurations such as seat stands integrated with lockers, as cubicle benches or freestanding.

Island benching: Freestanding bench, optional shoe tray.

Single-sided bench: Available with coat hook bar.

Double-sided bench: Freestanding with coat hook bar.

Cantilever seating: Depending on the strength of the wall, bracket recommended every 500mm.

Wall/floor seating: Fixed to either or both wall and floor. Recommend a bracket every 500mm.

Bespoke tailor-made solutions are also available. Wall-mounted coat hook bar with 5 hooks as standard. Bespoke options are available.

# Accessories

We carry and supply a wide range of accessories for all our ranges whether it's for a new project or to replace broken or missing items.

Clients are able to specify a wide range of carefully chosen high-quality accessories from standard locks to contactless locking systems.

Selected for superior styling with practical durability, our accessories add the perfect finishing touch to any changing room, washroom or locker room. Our main lock supplier is Ojmar Intelligent Locking Systems and they are able to supply locking systems suitable for both wet and dry environments and for different uses and types of user.

# Case Studies

# Eos Interiors, Birmingham

Helmsman has manufactured and supplied three-compartment luxury Glass Lockers that have been installed in Birmingham. The Formica storm colour against the white interior walls and Ojmar OCS combination locks give a modern finish. Special numbering plates were used to match the modern style. The Glass Lockers are floating in the middle of the wall thanks to our locker stands and cladding. This Glass Lockers project was a great success.

The corridor has curved walls, but this did not frighten us. Helmsman can deal with any type of space and requirements for any type of project.

# Station Road, Cambridge

Helmsman Z Lockers, 4 compartment Heavy Duty Lockers and Inline Cubicles were supplied, delivered and installed by Helmsman professionals in an office building in Cambridge.

Our new range of cubicles went into both male and female shower rooms with seat stands attached to bespoke slopping top Z Lockers suitable for a wet environment. Bespoke privacy panels and benches were supplied in each cubicle to keep the bench clear of the water. The bespoke 4 compartment Heavy Duty Lockers were used in the drying room, they were all perforated to allow ventilation. Natural Ash laminate was used across all of our Lockers and Inline Cubicles. Overall this Z lockers and cubicles project was a success as our client was extremely happy with the finished result.
