

POWERHUB LOCKER

SPECIFICATION

The Powerhub is a charging locker with a bank of 10 secure tool charging lockers with twin 13A 240v RCD sockets behind each lockable door.

With room to store and charge electronic devices, Powerhub improves and enhances the site experience. By keeping the charging cables neatly tucked within the lockers, it also lessens the risks of trips and falls.

Powerhub is incredibly portable, durable and ready to simply just plug in. It is certified and electronically safe despite its flexibility.

Product Specification

Dimensions (H x W x Dmm)

- Bank of 10 - 1867 x 600 x 355
- Each compartment - 331 x 256 x 300

- The lockers are secured with a twin 13A 240V RCD socket in each compartment.

- The Lockers are powered by a 3m lead rubber cable.

- A sloping top to prevent items from being left on the locker; which reduces on-site lost property.

- Each Locker is perforated to allow airflow around the lockers while guaranteeing that the tools and electronic devices that are stored will remain at a safe temperature.

- Each locker can be supplied with a Camlock with two keys per lock or a hasp lock for the user's own padlock.

- Other Locks are also available such as digital or £1 coin return.
