A red brick building with a statue of a man on a pedestal in front of it. The statue is of a man in a blue shirt and white trousers, holding a large wheel. The building has several windows and a door. The background is a clear blue sky.

Who We Are

With over 5,500 square metres of offices and factory in Bury St Edmunds, our local workforce has over 40 years of experience working with architects, designers, specifiers, contractors and end-users helping them realise their most creative projects.

We are used to working across different sectors from leisure, healthcare and education through to commercial, retail, construction and industrial.

We can offer off-the-shelf products as well as bespoke solutions, be they aluminium, steel, glass or solid grade laminate. With a wide range of colours and styles, coupled with options from charging points to different locking systems, we provide the very best solutions for any project.

We supply throughout the UK and Ireland as well as across Europe and the Middle East and can offer supply only solutions to a fully managed turnkey service if preferred by the client.

Fabrication

All our lockers are manufactured at our factory in Suffolk where we have long-serving skilled teams producing high-quality bespoke lockers and cubicles manufactured for each project.

Installation

Once the order is placed, the project is handed to the locker and cubicle installation manager who is responsible for overseeing the team that will install the lockers and cubicles. He works alongside the factory manager and ensures the products are manufactured on time and to the correct specification within the agreed time frame.

After Sales Service

To maximise optimal performance and the longest life cycle, we offer a complete range of after-sales care and service. This ranges from a regular maintenance contract to ad hoc repairs. We handle repairs and maintenance of lockers and cubicles too.

The background of the right side of the page features a blurred image of architectural drawings or blueprints, showing various lines and shapes. In the bottom right corner, a portion of a calculator is visible, with numbers like 214, 3/3, 3, 4, and 5 on its display.

Our Process

Laminate Lockers

Our laminate locker doors are made from high-end laminate, they give years of service and withstand wear and tear.

With a multitude of colour choices, designs and styles, laminate lockers can blend into existing surroundings and add to the mood and character of a room. Laminate lockers are ideally suited for schools.

Manufactured from aluminium and stainless steel and doors from 10mm solid grade laminate, suitable for wet environments. A mild steel body is used for dry environments. Standard sizes are 1800H/1775H X 300W X 300D/450D 1800H/1775H X 380W X 450D.

We are more than happy to manufacture lockers to suit customer requirements and can create bespoke lockers with bespoke sizes.

Essential Metal Lockers

Metal is the traditional material for the fabrication of lockers and the clanging of metal locker doors is synonymous with many people's childhood schooling. While other materials are also now commonly used, there are applications where metal lockers are still the preferred choice for storage solutions.

Available in full-length or 2 to 6 doors as standard. Door frames have added strength and security. Formed from heavy gauge mild steel of press-formed channel section, they are robust and are designed to give years of use.

Standard sizes are 1800H/1775H X 300W X 450D 1800H/1775H X 380W X 450D 1800H/1775H X 450W X 450D Other sizes available on request. Manufactured from heavy gauge mild steel - Powder-coated metal door.

Front Line Cubicles

Front line cubicles form part of our standard range and are suitable for wet and dry toilet and changing room applications. This bespoke range is available in different sizes and dimensions depending on the client's needs and available in everything from Early Years with low-level cubicle doors to commercial offices, healthcare, and leisure projects.

Changing rooms are supplied with seats manufactured from solid grade laminate or slatted hardwood and can be fixed or cantilevered.

Cubicles are manufactured from solid grade laminate. All exposed edges smoothed and radiused. Headrail material is from rounded extruded aluminium. Aluminium 'U' brackets with tamper-proof fixing used for securing panels to each other and walls.

Bench Seating

We manufacture bench seating as either a standalone product or part of an integrated washroom solution with complimentary lockers and cubicles. Suitable for both wet and dry areas, the high-quality bench seating provides comfort and durability.

They are available in a wide range of configurations such as seat stands integrated with lockers, as cubicle benches or freestanding.

Island benching: Freestanding bench, optional shoe tray.

Single-sided bench: Available with coat hook bar.

Double-sided bench: Freestanding with coat hook bar.

Cantilever seating: Depending on the strength of the wall, bracket recommended every 500mm.

Wall/floor seating: Fixed to either or both wall and floor. Recommend a bracket every 500mm.

Bespoke tailor-made solutions are also available. Wall-mounted coat hook bar with 5 hooks as standard. Bespoke options are available.

Accessories

We carry and supply a wide range of accessories for all our ranges whether it's for a new project or to replace broken or missing items.

Clients can specify a wide range of carefully chosen high-quality accessories from standard locks to contactless locking systems.

Selected for superior styling with practical durability, our accessories add the perfect finishing touch to any changing room, washroom or locker room. Our main lock supplier is Ojmar Intelligent Locking Systems and they can supply locking systems suitable for both wet and dry environments and different uses and types of user.

Case Studies

Trowse Primary School, Norwich

Helmsman two-compartment heavy-duty lockers were supplied, delivered and installed by Helmsman professionals in Trowse Primary School corridors. Bespoke specification of 1600mm height and a range of different door colours were chosen to brighten up this primary school. Each compartment door was fitted with an oval laminated number plate, from 1 to 60 twice.

Blue and grey themed lockers were fitted on the first floor, while green and grey themed lockers were fitted on the second floor to split the floors. Diamond swivel locks were fitted on the lockers for easy use and pleasing aesthetics. These primary school lockers projects fill the school corridors with great colours and extra storage space for the KS1 pupils.
